safety precautions

SAFE USE OF THE EQUIPMENT

1. TO TURN ON

LEAVE ROOM FOR VENTILATION

AVOID HEAT, WATER, DIRECT SUNLIGHT.

Do not place audio loudspeakers near to television. The magnets in the speakers could cause patches of colour to appear on the screen.

To ensure your personal safety and the efficient operation of your equipment, please follow the advice given below :

Télévision sets need ventilation to avoid overheating which can cause damage to the components. The ventilation slots at the back of the set should not be covered up by curtains, small covers, newspapers, etc... There must be enough room in built-in cabinets to allow for the cooling air to circulate. The set should not be placed directly next to heating.

This appliance is designed for use in dry areas. If occasionally you should whish to operate it outdoors (for example, on the balcony or veranda), you must insure that it is protected against all forms of moisture (dew, rain, splashed water).

A cold set may be switched on in a warm room only after any condensation which may happen to be on the screen has evaporated. Never remove the cabinet back. Have your aerial installed by an authorised dealer or service technician.

GB

In the evenings, after the TV programmes, or in case of a prolonged absence, it is recommended that the appliance be switched off using the main power switch. Even if the ON/OFF switch is in OFF position the television set is not completely separated from the mains. In order to separate it completely from the mains, it has to be disconnected by unplugging the mains plug. Remove the power plug from the wall outlet under the following conditions :
1. During a thunderstorm. It is also recommended that you disconnect the aerial plug.
2. If you find a burning smell or smoke emerging from the set.

Additional information :
Your TV set is adequately shielded to prevent emission of X-rays. The acceleration voltage does not exceed the maximum value of 33 kV.

Work by non-qualified technicians, modification of the high voltage setting or the replacement of the tube with a model that does not comply with the manufacturer's specifications may lead to a considerable increase in X-ray radiation.
A set changed in any of the above ways no longer satisfies the initial specifications and should not be put back into service.

2. CARE OF THE EQUIPMENT

The screen should be cleaned with liquid glass cleaner.
• Never use abrasive cleaners.
• To clean the front and the cabinet of your equipment use a soft cloth dipped in mild detergent. The use of strong solvents such as white spirits or alcohol based products could damage your equipment.
• Clean the vents on the rear panel of your set regularly.

3. DEMAGNETISATION

The earth's magnetic field may have an effect on your television by causing patches of colour to appear on the screen. If this happens :
• Switch off the television with the on-off button ;
• Wait a few minutes and then press again to switch on.
This allows the screen to be demagnetised automatically. If patches of colour are still visible repeat the procedure.

VIDEO RECORDER CONNECTIONS

VIA THE AERIAL SOCKET

To tune your TV into your VCR you should refer to Manual Programming (page 31).
The channel number (usually 36 or 60) is given in the manual of your VCR. The programme selected for your VCR must be 9, 19 or 29.
Whenever you wish to use your VCR, you must select the programme assigned to it.

Refer to your VCR manual

VIA THE EURO-AV SOCKET 1 (AV1)

This is used to connect :
• Satellite receiver or decoder
• a VHS or 8mm video recorder or camcorder (VIDEO) or an S-VHS or Hi-8mm video recorder or camcorder (S-VIDEO)
• a PC or video games console (RGB).

VIA THE EURO-AV SOCKET 2 (AV2)

This is used to connect :
• a VHS or 8mm (VIDEO), S-VHS or Hi-8mm (S-VIDEO) video recorder.

If you have two VCRs connected, the decoder must be connected to the VCR connected to the Euro-AV1 socket.
If you have a satellite receiver, refer to the operating manual in order to find out the type of signal delivered then select VIDEO, S-VIDEO or RGB.
You can also connect it to the decoder socket of the second VCR if the latter is fitted with one.

VIA THE AUDIO/VIDEO/S-VIDEO SOCKETS (AV2)

This is used to connect :
• an S-VHS or Hi-8mm videorecorder (S-VIDEO) (S and AUDIO sockets).

In order to maintain the optimum sound and picture quality of your set, it is recommended not to connect 2 units to the Euro- AV1 socket and the AUDIO/VIDEO/S sockets simultaneously.
VIA THE AUDIO/VIDEO/S-VIDEO SOCKETS (AV3)

This is used to connect :
• a camcorder VHS or 8 mm (VIDEO)(VIDEO and AUDIO sockets)
   S-VHS or Hi 8 mm (S-VIDEO)(S and AUDIO sockets).
